

Do your clients want “WOW” on their lawns?

Zeon Zoysiagrass is truly in a class by itself.

Simply the most beautiful grass we have ever seen, Zeon masters the complex balancing act between the art of lush beauty and the science of prime performance. Exquisite enough for the highest-end residences and commercial properties, yet resilient enough to take the rough-and-tumble play of children and pets, Zeon surpasses the expectations of even your discriminating customers.

An excellent alternative to bermudagrass, Zeon provides a premium warm-season turfgrass surface. However, it grows more slowly than bermudagrass, reducing encroachment into flowerbeds and cutting your labor needs for mowing and edging. Zeon also requires far less nitrogen than most bermudas, slashing fertilization expenses by up to 50%. Plus, its bright green color creates a striking contrast with darker foundation shrubbery and colorful ornamentals.

When good simply isn't good enough, Zeon zoysiagrass gives your clients the “wow factor.” In the Carolinas, Virginia, Florida, and Georgia, SodStar is the professional landscapers' source for the highest quality, “Blue Tag” certified Zeon zoysiagrass sod.

Zeon Zoysiagrass

Attributes and Benefits

- ✓ Fine texture and dark-green color = “wow factor” for high-end clients.
- ✓ Low fertility requirement = fewer inputs and cost savings.
- ✓ Excellent shade tolerance = versatile.
- ✓ Exceptional drought tolerance = reduced irrigation needs.
- ✓ Early spring greenup and excellent fall color retention = extended aesthetics.
- ✓ Resistant to insects and diseases = reduced pesticides.
- ✓ Warm-season variety suited for Hardiness Zones 7B, 8A and 8B.

Best Management Practices

Sunlight Requirement: Optimum performance with 4 to 6 hours of sun.

Mowing: Best maintained at 0.375" to 1.0" (reel mower) or 1.0" to 2.0" (rotary mower).

Fertility: Requires less than 2 lbs. N/1,000 ft²/year.

Weed Control: All herbicides labeled for use on zoysiagrass can be safely applied to SodStar's Zeon zoysiagrass. Always follow label instructions.

Disease Control: Zoysiagrass can be susceptible to large patch in spring and fall. Use an appropriate fungicide preventatively on high-end applications, or treat curatively (as needed) on lower-maintenance applications. All fungicides labeled for zoysiagrass can be safely applied to SodStar's Zeon zoysiagrass. Always follow label instructions.

Insect Control: Zoysiagrass is naturally resistant to most insects. Most insecticides labeled for use on zoysiagrass can be safely applied to SodStar's Zeon zoysiagrass
